MMG LIMITED
五礦資源有限公司

(Incorporated in Hong Kong with limited liability)
(STOCK CODE: 1208)

FIRST QUARTER PRODUCTION REPORT FOR THE THREE MONTHS ENDED 31 MARCH 2013

The board of directors (Board) of MMG Limited (Company) is pleased to provide the First Quarter Production Report for the three months ended 31 March 2013.

The report is annexed to this announcement.

By order of the Board
MMG Limited
Andrew Gordon Michelmore
CEO and Executive Director

Hong Kong, 30 April 2013

As at the date of this announcement, the Board comprises nine directors, of which two are executive directors, namely Mr. Andrew Gordon Michelmore and Mr. David Mark Lamont, four are non-executive directors, namely Mr. Wang Lixin (Chairman), Mr. Jiao Jian, Mr. Xu Jiqing and Mr. Gao Xiaoyu; and three are independent non-executive directors, namely Dr. Peter William Cassidy, Mr. Anthony Charles Larkin and Mr. Leung Cheuk Yan.

FIRST QUARTER PRODUCTION REPORT

FOR THE THREE MONTHS ENDED 31 MARCH 2013

	1Q 13	1Q 13 vs 1Q 12	1Q 13 vs 4Q 12
COPPER CATHODE (tonnes)			
Kinsevere ¹	13,910	459%	14%
Sepon	20,480	4%	-13%
Total	34,390	55%	-4%
COPPER (contained metal in concentrate, tonnes)			
Golden Grove	7,898	31%	-20%
Rosebery	247	-49%	-41%
Total	8,145	25%	-21%
ZINC (contained metal in concentrate, tonnes)			
Century	105,279	-21%	-31%
Golden Grove	3,103	-71%	N/A
Rosebery	19,014	5%	-2%
Total	127,396	-22%	-26%
GOLD (ounces)			
Rosebery	1,318	-64%	-32%
Sepon	9,068	-70%	-7%
Total	10,386	-70%	-11%
LEAD (contained metal in concentrate, tonnes)			
Century	4,690	12%	-21%
Golden Grove (HPM)	275	-82%	N/A
Rosebery	5,392	-1%	-8%
Total	10,357	-7%	-12%

(1) MMG acquired Kinsevere following the acquisition of Anvil Mining Limited. Production for the first quarter 2012 is shown from 1 March 2012.

KEY POINTS

- Production and cost guidance maintained for all commodities across all sites, with the exception of copper production at Golden Grove.
- Overall lower production following a record December quarter.
- Total copper production 7% below the fourth quarter 2012 following planned maintenance at Sepon and ramp-up at Golden Grove and 48% above the same period in 2012 due to the inclusion of Kinsevere and improved production at Sepon.
- Lower zinc production compared to all periods due to lower grade at Century.
- Quarterly MMG ore mining records achieved at Kinsevere, Sepon and Golden Grove highlighting MMG's commitment to maximising productivity and improving efficiencies at all stages of the mining process.

SAFETY AND HEALTH

In the first quarter 2013 there were 14 recordable injuries resulting in a 12-month moving average (mma) total recordable injury frequency rate (TRIFR) of 2.8. The 12mma lost time injury frequency rate for the first quarter was 0.7 with three lost time injuries reported.

ENVIRONMENT

During the quarter there was one Significant Environmental Incident:

- Rosebery reported a significant environment incident, associated with an external release of contaminated water, originating from the copper-lead return water line. The spill was contained and the water line repaired. The Tasmanian Environment Protection Authority (EPA) conducted a site visit and indicated that this event has not resulted in significant environmental contamination and identified a number of actions to prevent recurrence. This event is also classified as a licence exceedence.

There were three environmental licence exceedences:

- During the first quarter 2013, renegotiation of the Avebury Environmental Protection Notice water discharge conditions were accepted in principle by the EPA. Formal notification is expected in the second quarter 2013 and will result in a significant reduction in licence exceedences reported. The ongoing situation of licence exceedences was recognised as an ongoing issue by the EPA based on inappropriate licence conditions. Under these conditions, Avebury reported three licence exceedences when discharge conditions for a suite of metals were elevated. MMG had received formal notification from the EPA recognising that these discharges are not causing additional harm to the receiving environment.

COMMODITY PRICES, MARKETING AND SALES

LME cash price	Quarter – average			Quarter – close		
	1Q 13	1Q 12	4Q 12	1Q 13	1Q 12	4Q 12
Copper (US\$/t)	7,931	8,310	7,910	7,582	8,480	7,915
Gold (US\$/oz)	1,632	1,691	1,720	1,600	1,662	1,664
Lead (US\$/t)	2,301	2,093	2,200	2,094	2,021	2,340
Silver (US\$/oz)	30.11	32.63	32.65	28.64	32.43	29.95
Zinc (US\$/t)	2,033	2,025	1,950	1,870	2,003	2,035

Average LME prices for zinc and copper in the first quarter 2013 were generally in line with the previous quarter. However, prices of both commodities ended the quarter lower following weaker demand from China, the world's largest global copper consumer; and headwinds from troubled economies in the Eurozone.

Although LME copper stocks increased during the quarter, market demand for both copper cathode and copper concentrates remained steady. Chinese bonded warehouse stocks, which had been growing throughout the second half of 2012, started to reduce in the first quarter 2013 and there were signs of improving demand from Chinese copper consumers following the Spring Festival holiday period in February.

LME stocks of zinc and lead have trended down in recent months and future supply continues to be challenged by resource exhaustion at major mines. Commodity analysts generally forecast limited downside risk in zinc and lead prices as the cost of production at several mines and smelters are close to current prices.

Despite the market fluctuations seen so far this year, MMG has continued to experience solid demand for all of its metal and concentrate products and is maximising sales volumes accordingly.

PROVISIONAL PRICING

The following table provides a summary of the contained metal that was sold but provisionally priced at the end of the first quarter 2013 and the month that final average pricing will occur.

Open pricing at 31 March 2013	Apr 2013	May 2013	Jun 2013	Total
Copper (tonnes cathode and copper contained in concentrate)	9,876	3,905	-	13,781
Gold (payable ounces in concentrate)	1,511	437	-	1,947
Lead (tonnes)	2,359	-	-	2,359
Silver (ounces)	266,124	45,730	42,457	354,311
Zinc (tonnes)	43,127	21,634	-	64,761

OPERATIONS REVIEW

SEPON

	1Q 13	1Q 13 vs 1Q 12	1Q 13 vs 4Q 12
Copper cathode (tonnes)	20,480	4%	-13%
Gold (ounces)	9,068	-70%	-7%

A quarterly copper mining record was achieved at Sepon with 1.2 million tonnes of ore mined in the first quarter; a result of improved productivity following the transition to an owner-operated mine in 2012. The annual shutdown involving scheduled maintenance of the copper processing plant resulted in a 13% decrease in copper cathode production compared to the previous quarter. Sepon continued to operate above design nameplate capacity in the first quarter 2013 delivering a 4% increase when compared to the first quarter 2012.

MMG maintains annual guidance of 83,000–88,000 tonnes of copper cathode in 2013 at a C1 cost of US\$0.95–US\$1.05 / lb.

Gold production was 7% below the previous quarter due to lower ore availability and lower recovery. MMG maintains annual guidance of 45,000–55,000 ounces of gold in 2013 at a C1 cost of US\$1,250–US\$1,400 / oz.

KINSEVERE

	1Q 13	1Q 13 vs 1Q 12	1Q 13 vs 4Q 12
Copper cathode (tonnes) ¹	13,910	459%	14%

Kinsevere achieved a consecutive production record with 13,910 tonnes of copper cathode produced during the first quarter 2013, a 14% increase compared to the prior quarter. Comparative production in the first quarter 2012 included production for only the month of March following the completion of the acquisition of Anvil Mining in February 2012.

A quarterly mining and milling record was also achieved at Kinsevere following the delivery of additional heavy earth moving mining equipment and improvements in power supply reliability and electrical integrity. Head grade and recoveries were lower than all comparable periods in accordance with the mine plan.

Following a general improvement in electricity supply and reliability the majority of Kinsevere power requirements are currently sourced via the electricity grid, however additional power continues to be generated from diesel as required.

MMG maintains annual guidance of 57,000–62,000 tonnes of copper cathode in 2013 at a C1 cost of US\$1.40–US\$1.70 / lb.

(1) MMG acquired Kinsevere following the acquisition of Anvil Mining Limited. Production for the first quarter 2012 is shown from 1 March 2012.

CENTURY

	1Q 13	1Q 13 vs 1Q 12	1Q 13 vs 4Q 12
Contained metal in concentrate			
Zinc (tonnes)	105,279	-21%	-31%
Lead (tonnes)	4,690	12%	-21%

Zinc in zinc concentrate production was lower than all comparable periods as Century starts to progress through the final stages of the mine plan. Despite good throughput, lower feed grade and recovery resulted in a 31% decline in production when compared to the prior quarter production record.

Lead in lead concentrate production was 21% lower than the fourth quarter 2012 due to lower throughput.

Concentrate sales were impacted by delays to the shipment schedule due to a rudder replacement on the MV Wunma, MMG's custom-built vessel which transfers concentrates from the Century Port facility to export ships anchored in the Gulf of Carpentaria.

A planned shutdown also occurred in the quarter to conduct maintenance and improvements of the processing plant and dewatering facilities. Further improvements will be undertaken to sustain the higher throughput rates and recoveries necessary for Century to achieve its future production targets.

MMG maintains annual guidance of 480,000–490,000 tonnes of zinc in zinc concentrate and 38,000–42,000 tonnes of lead in lead concentrate in 2013 at a C1 cost of US\$0.58–US\$0.62 / lb.

ROSEBERY

	1Q 13	1Q 13 vs 1Q 12	1Q 13 vs 4Q 12
Contained metal in concentrate			
Zinc (tonnes)	19,014	5%	-2%
Gold (ounces)	1,318	-64%	-32%
Lead (tonnes)	5,392	-1%	-8%
Copper (tonnes)	247	-49%	-41%

Zinc in zinc concentrate production and lead in lead concentrate production was 2% and 8% respectively below the previous quarter as a result of lower tonnes milled. The reduced throughput was a result of the installation of a new cone crusher and higher than planned head feed grades for zinc and lead.

Gold doré and copper production were lower than all comparable periods due to lower head feed grade and recovery.

MMG maintains annual guidance of 75,000–80,000 tonnes of zinc in zinc concentrate at a C1 cost of US\$0.25–US\$0.30 / lb and also expects to produce 20,000–22,000 tonnes of lead in lead concentrate in 2013.

GOLDEN GROVE

	1Q 13	1Q 13 vs 1Q 12	1Q 13 vs 4Q 12
Contained metal in concentrate			
Copper (tonnes)	7,898	31%	-20%
Zinc (tonnes)	3,103	-71%	N/A
Lead (HPM, tonnes)	275	-82%	N/A

A quarterly copper mining record was achieved at Golden Grove in the first quarter 2013 following the continuation of mining from the recently commissioned copper oxide open pit. Copper ore mined increased 22% compared to the previous quarter and zinc ore mined decreased 3% as the mine plan currently favours copper.

Copper in copper concentrate production was 20% lower compared to the fourth quarter 2012 due to slower than expected ramp-up of processing copper oxide ore from the new open pit.

MMG did not produce any zinc or High Precious Metals (HPM) concentrate in the fourth quarter 2012 and underground mining resumed in January.

MMG maintains annual C1 cost guidance of US\$2.80–US\$3.10/lb for copper and US\$0.45–US\$0.55/lb for zinc. Copper production guidance has been reduced to 30,000–35,000 tonnes of copper in copper concentrate due to ramp-up delays in copper oxide processing and annual zinc guidance of 17,000–20,000 tonnes of zinc in zinc concentrate is maintained.

DEVELOPMENT PROJECTS

DUGALD RIVER

During the first quarter 2013, underground mine development reached 6,090 metres against planned progress of 4,630 metres which is 30% ahead of schedule. Mine development to date, enables MMG to gain a better understanding of geotechnical conditions of the proposed underground mine and optimise the mine plan accordingly.

Surface work progressed with the construction of stockpile pads and the bulk earthworks for process plant area. Contracts were also awarded for the first tranche of accommodation and permanent water supply pipeline. Pre-commitment activities continued including engineering design and tendering of infrastructure-related contracts.

Additional expenditure was approved by the Board enabling development and construction to continue leading up to the finalisation of financing arrangements which are expected to be completed in the second quarter 2013. Investigation of trial ore treatment at Century is underway to better understand metallurgical performance prior to construction of the processing plant. The first concentrate shipment is still expected to occur in the fourth quarter 2015.

IZOK CORRIDOR PROJECT

During the quarter, preliminary engineering for the concentrator processing facility and associated infrastructure was completed as part of the project feasibility study. Initial capital and operating cost estimates were developed and are being reviewed with practical value engineering initiatives aimed at improving the project economics, including potential modularisation of the mill.

MMG received approval from the Canadian Minister for Aboriginal Affairs and Northern Development to proceed to the next stage of the environmental assessment and regulatory review process.

SEPON PRIMARY GOLD

The prefeasibility study continued during first quarter 2013. A number of processing options are being evaluated, including whole-of-ore roasting and flotation followed by pressure oxidation (POX). Additional testing is being undertaken with the aim of improving recovery and forecast plant operating costs. Mining and engineering option studies to optimise waste dump and infrastructure locations are near completion.

Dry season baseline data gathering for the ESIA process has been completed. Wet season data collection is due to commence in the coming months.

The prefeasibility study is expected to be completed in the second half of 2013.

EXPLORATION

MINE DISTRICT EXPLORATION

SEPON

Sepon exploration continued the gold focus with drilling mainly at the Discovery-Namkok and Ban Mai at the eastern and western end of the mining district. Oxide gold drilling at Thengkham North/Dok Boua and Namkok resulted in discovery of extensions to mineralisation, now the subject of resource drilling. Drilling at Discovery West intersected significant primary gold mineralisation with assay pending. Drilling at Ban Main and initial drilling at Nakachan further west have returned moderate primary gold results.

GOLDEN GROVE

Diamond drilling at the Southern Leases at Grassi, Bassendean and Felix continued to return significant mineralisation.

ROSEBERY

The first diamond hole at the East Renison prospect 6 kilometres west of Rosebery intersected lead-zinc and copper mineralisation within the interpreted high-grade envelope of Salmons vein.

NEW DISCOVERY PROGRAMS

A number of geophysical surveys were carried out in Australia during the quarter. These include the completion of a ground gravity survey at the Birksgate Corridor at the Curnamona copper joint venture in South Australia, an airborne electro-magnetic survey at the Kitehawk copper joint venture in Western Australia and a magnetic survey at the Huckitta nickel joint venture in the Northern Territory. MMG also entered the Victoria River joint venture in the Northern Territory to explore for sediment-hosted zinc mineralisation.

In Mexico, scout drilling was completed at the Norcan project with no significant results. At the Seri project, a chalcocite zone was intersected and returned 24m at 0.5% Cu from 59m, including a 4.5m interval averaging 1.4% Cu.

CORPORATE UPDATE

DUGALD RIVER PROJECT FINANCING

MMG announced on 27 March 2013 that it had received an indicative non-binding commitment from China Development Bank Corporation (CDB) to arrange and underwrite the financing of the development and construction of the Dugald River project for an amount up to US\$1 billion and for a term of 13 years, subject to further negotiation and execution of a definitive loan agreement on terms satisfactory to CDB and MMG.

The financing arrangements are expected to be completed during the second quarter 2013.

SHAREHOLDER APPROVAL OF NEW SHARE OPTION SCHEME

MMG shareholders approved a new share option scheme at an Extraordinary General Meeting held on 26 March 2013, aimed at aligning the interests of senior managers and executives with those of our shareholders. The granting of options to senior management replaces the current cash-settled long-term incentive plan and remains subject to specific performance requirements.

CHANGE IN ACCOUNTING POLICY

MMG is yet to adjust the C1 cost calculation resulting from the adoption of Hong Kong (IFRIC) Interpretation 20 which deals with waste removal costs that are incurred in surface mining activity during the production phase of the mine. MMG will provide an update to guidance using the revised C1 cost calculation in the second half 2013.

ABOUT MMG LIMITED

MMG Limited is a mid-tier global resources company which explores, develops and mines base metal deposits around the world. It is headquartered in Melbourne, Australia and listed on the Stock Exchange of Hong Kong (Stock Code: 1208).

MMG Limited currently owns and operates the Century, Golden Grove and Rosebery mines in Australia, the Kinsevere mine in the Democratic Republic of Congo and the LXML Sepon mine in Laos.

The Company is one of the world's largest producers of zinc and also produces significant amounts of copper, lead, gold and silver.
